

Visioneering Wichita: Health Care Alliance
Focus Area: Access

Among our community strengths and opportunities—where do we have an opportunity to work together differently?

Questions for consideration:

1. Can a coalition do that?
2. Are we getting to “actionship”?
3. Which strategy will we need to use-- *Awareness/Education, Policy, or Program?*

ACTION PLAN: HOW WE GET THERE

<p>Issue: Need for increase in primary care</p>	<p><i>Strategy: Expand PCP- community clinic capacity, bricks and mortar, increase interdisciplinary team of providers , navigate education</i></p>
<p>Who needs to be involved?</p>	
<p>What are the first steps?</p>	<ol style="list-style-type: none"> 1. Buildings 2. Providers 3. CM/navigation and health literacy education
<p>When can this be accomplished by? One year? Five years?</p>	
<p>What will be different?</p>	<p>Decrease in chronic diseases Increase in improved health status</p>
<p>What will we measure?</p>	<p>Measure levels of chronic illness, decrease in EMS utilization, decrease in Emergency Department use, measure what Sonja presented</p>

Comments/Notes: Coverage, underinsured, EMS, hospital Emerg Dept -> health literacy -> navigation
